International cooperation is critical to realizing many global and national policies and agendas. The city of Geneva is host to 38 international organizations, approximately 750 NGOs and almost 180 member state missions to the UN Office in Geneva in addition to many business and financial institutions. SDG-focused organisations based in Geneva exist within an ecosystem which curtails or enables their decision-making, priorities, funding and ways of knowing.

This event focuses on developing understanding of the ecosystem of international cooperation for education located in Geneva, and the intersectoral connections across to climate, health, work, and many other sectors. We use systems mapping to make the International Geneva ecosystem visible, revealing the hidden obstacles, untapped connections, and potential leverage points of this complex ecosystem.
