

Achieving Equitable Education

Missing Education Data and the SDG 4 Data Regime

We have passed the midpoint of the Sustainable Development Goal agenda, but the achievement of Goal 4 (SDG 4) on “inclusive and equitable quality education” for all remains uncertain. Gaps in the education data regime are one driver of this uncertainty. Such missing data often affect contexts and groups that are being left furthest behind on the various targets outlined in SDG 4. The chapters of this book provide a nuanced understanding of education data gaps across regions, themes, and levels of education systems. This book contributes to envisioning a more effective global education data regime that can better support the achievement of quality education for all.
